

Portable Propane Powered Fan

98% reduction in Carbon Monoxide •

NO exhaust odor or hot exhaust extensions •

DOT high pressure LP lift truck cylinder with level gauge •

Extra long run time: 5+ hours at full throttle on a 3.3 gal (14#) propane tank •

Propane doesn't go bad over time; no old fuel •

Minimal noise level: a quiet 96 dB measured from 4 feet behind the fan •

Patented outwardly curving legs provide larger footprint for increased stability as fan is elevated •

Three differentially-extendible, screw-lock legs stand securely on uneven ground and minimize "walking" •

Optional Halogen Flood Light. Instant light when fan starts, right where it's needed. Lights scene and fan for safety

Efficient design allows for maximum air volume, quiet operation and one-person setup

Kevlar™ and fiberglass-clad aircraft-type propeller; computer-aided design for superior efficiency, durability and safety

Rugged, heavy-duty, MIG-welded guard for durability.

8 Inch Pneumatic wheels are standard

Legs lock in any position allowing downward aiming and compact storage

**24 INCH
LP Powered
HONDA GX200
with Optional Halogen Light**

Increased propeller clearance to eliminate debris pick-up, ejection and erosion; enhances safety

Stands securely on any surface

One-person transport and setup

ALL-TERRAIN
VENTRY
PPV FANS

Compact storage

Two-person carry

Legs fully extendable
